EDUCATION

University of New South Wales

Bachelor of Science, Computer Science – 71.5 WAM

February 2023 – August 2026

Sydney, NSW

EXPERIENCE

Software Engineer

MITE

Sep 2025 – Present

Sydney, NSW

- Develop and maintain a full-stack marketplace application with a NestJS/PostgreSQL backend and Next.js frontend, covering Firebase multi-provider authentication.
- Design and implement REST and WebSocket APIs backing core marketplace features.
- Own the CI/CD pipeline across production and development environments using GitHub Actions, Docker, and Terraform, alongside scalable image upload infrastructure on Cloudflare with serverless Worker validation.

Store Team Member

Woolworths Group

Aug 2025 – Aug 2026

Sydney, NSW

- Replenish shelves and refrigerated food sections, ensuring product availability and correct stock rotation.
- Provide customer assistance on the shop floor while maintaining organisation and cleanliness in storage areas.

Online Fulfilment Team Member

Myer

Sep 2024 – Dec 2024, Sep 2025 – Dec 2025

Sydney, NSW

- Collaborated with team members to efficiently process and fulfil high volumes of online orders.
- Enhanced in-store presentation through visual merchandising and managed inventory restocking operations.

Waiter

China Castle

May 2021 – Jan 2023

Auckland, New Zealand

- Delivered excellent customer service in a fast-paced restaurant while managing orders, bookings and payments.
- Assisted with food preparation, dishwashing, and maintaining a clean, organised kitchen and dining area.

PROJECTS

Interactive Symbol Parser | *SvelteKit, TypeScript, PyTorch, ONNX, PostgreSQL*

- Built a browser-based drawing interface that parses hand-drawn visual symbols into an AST-like representation, validates spatial relationships, and compiles recognized diagrams into real-time animated effects.
- Trained and integrated a multi-head ResNet18 model for client-side symbol recognition, converting the trained PyTorch model to ONNX for in-browser inference that identifies each drawn symbol and estimates its angle, scale, and position.

Natural-Language Data Transformation Platform | *Django, React, Redis, Celery, PySpark, AWS*

- Built a tool that turns natural-language prompts into regex with AI, caches them in Redis, and dispatches them through Celery as distributed PySpark jobs to find and replace patterns across millions of rows.
- Provisioned AWS infrastructure (S3, IAM, EC2) as code via Terraform, with automated cost-based server shutdown.

CERTIFICATIONS & AWARDS

AWS Certified Cloud Practitioner (CLF-C02)

August 2026

Best Design Award & Honourable Mention (Best Use of Elastic) – [UNIHack](#)

March 2026

First Place – [HACKaByte Hackathon](#)

March 2025

VOLUNTEER EXPERIENCE

Training Lead

UNSW Software Development Society

Jun 2024 – Sep 2024

Sydney, NSW

- Led a team of student developers to design a full-stack web application collaboratively.
- Provided technical mentorship to students across web development, Git workflows, and collaborative practices.

Peer Mentor

UNSW Computer Science and Engineering Society

Jan 2024 – May 2024

Sydney, NSW

- Provided one-on-one mentorship to first-year students, offering academic support and guidance.
- Organised social and academic events to help mentees integrate into university life.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, Bash, Java, C, C++, Rust

Frameworks/Libraries: NestJS, Express, Django, FastAPI, Flask, Next.js, React, TailwindCSS, Prisma, PyTorch, PySpark

Databases/Cloud: PostgreSQL, Redis, Firebase, AWS, Google Cloud Platform, Cloudflare

Tools/Practices: Docker, Terraform, GitHub Actions, CI/CD, Git, Linux, REST APIs, WebSockets
