EDUCATION

University of New South Wales

Bachelor of Science (Computer Science) - 71.3 WAM

February 2023 – Present

Sydney, NSW

EXPERIENCE

Software Engineer

MITE

Sep 2025 – Present

Sydney, NSW

- Develop and maintain a NestJS/PostgreSQL backend serving a Next.js/React frontend, covering Firebase multi-provider auth (Google/Apple/phone), messaging, search, and media upload across the full stack.
- Implement REST and WebSocket APIs backing marketplace flows including listings, offers, real-time chat, and notifications.
- Own the deployment pipeline across prod, stage, and alpha environments using GitHub Actions, Docker, and Terraform, alongside image upload infrastructure on Cloudflare R2 with serverless Worker validation.

Store Team Member

Woolworths Group

Aug 2025 – Present

Sydney, NSW

- Replenish shelves and refrigerated food sections, ensuring product availability and correct stock rotation.
- Provide customer assistance on the shop floor while maintaining organisation and cleanliness in storage areas.

Online Fulfilment

Myer

Sep 2024 – Dec 2024, Sep 2025 – Dec 2025

Sydney, NSW

- Collaborated with team members to efficiently process and fulfil high volumes of online orders.
- Enhanced in-store presentation through visual merchandising and managed inventory restocking operations.

Waiter

China Castle

May 2021 – Jan 2023

Auckland, New Zealand

- Delivered excellent customer service in a fast-paced restaurant while managing orders, bookings and payments.
- Assisted with food preparation, dishwashing, and maintaining a clean, organised kitchen and dining area.

PROJECTS

Interactive Symbol Parser | *SvelteKit, TypeScript, PyTorch, PostgreSQL*

- Built a browser-based drawing interface that parses hand-drawn visual symbols into an AST-like representation, validates spatial relationships, and compiles recognized diagrams into real-time animated effects.
- Trained and integrated a multi-head ResNet18 model for client-side symbol recognition, converting the trained PyTorch model to ONNX for in-browser inference that identifies each drawn symbol and estimates its angle, scale, and position.

Research Paper Discovery & Digest | *Next.js, Typescript, PostgreSQL*

- Developed a personalized paper recommendation system scraping OpenAlex API with exponential decay ranking, delivering daily digests via scheduled email using Supabase PostgreSQL message queues for async background processing.
- Developed an AI summarization pipeline with encrypted API key management and batch summarization to reduce costs, alongside a React interface for key management and summary delivery.

ACHIEVEMENTS

Best Design Award & Honourable Mention (Best Use of Elastic) – [UNIHack](#)

March 2026

First Place – [HACKaByte Hackathon](#)

March 2025

VOLUNTEERING

Training Lead

UNSW Software Development Society

Jun 2024 – Sep 2024

Sydney, NSW

- Led a team of student developers to design a full-stack web application collaboratively.
- Provided technical mentorship to students across web development, Git workflows, and collaborative practices.

Peer Mentor

UNSW Computer Science and Engineering Society

Jan 2024 – May 2024

Sydney, NSW

- Provided one-on-one mentorship to first-year students, offering academic support and guidance.
- Organised social and academic events to help mentees integrate into university life.

TECHNICAL SKILLS

Languages: Python, TypeScript/JavaScript, SQL, Bash, Java, C, C++

Frameworks/Libraries: NestJS, Express.js, FastAPI, Flask, Next.js, React, Svelte, TailwindCSS, PostgreSQL, Prisma

Tools/Platforms: Docker, Cloudflare, Google Cloud Platform, Terraform, Git, Linux
